Education aims to develop the potential of students to become human beings who are faithful and devoted to God Almighty, have noble character, are healthy, knowledgeable, independent, and become obedient and responsible citizens. Scholarship is a form of award in the form of financial assistance given to individuals or organizations for work achievements that have been produced. The award can be in the form of certain financing or access to an institution in the form of financial assistance for learning activities. So that a decision support system for receiving scholarships is needed that is able to determine scholarship recipients with a certain number of quotas.
