*To find out the extent to which learning outcomes for basketball Lay Up Shoot have improved through peer tutorial via YouTube media for students of SMA Negeri 6 in Bengkulu City. The research design is classroom action research with research procedures through; planning, action, observation, and reflection. The research subjects were class XA students of SMAN 6 in Bengkulu City, totaling 36 students. The research instruments used were the lay up shoot test and observation sheet. The research show that peer tutorial via YouTube media is very effective in improving lay up shoot learning outcomes in basketball games at SMAN 6 in Bengkulu City. Improved learning outcomes for lay up shoots in basketball games using peer tutorial via YouTube tutorial media, namely with an average score of 70.27 in cycle I increasing to 80.55 in cycle II. 2) Apart from improving the quality of learning, the peer tutorial method is recommended to help teachers foster joy and enjoyment in students in competitive situations and to be able to motivate students to learn.*
