*This research aims to determine the level of dribbling skills in futsal games at SMK Negeri 1 South Bengkulu. This type of research is descriptive research. The research sample consisted of 20 people. The instrument used in this research was a dribbling test in a futsal game. Where the results of the level of dribbling skills in this study show a classification of "good" to "very poor". Then where are the results of the final test of dribbling skills, as follows: of the 20 futsal players at SMK Negeri 1 South Bengkulu, 4 people (20%) were in the very poor category. A total of 5 people (25%) were in the poor category. A total of 10 people (50%) had the medium category and 1 person (5%) had the good category. Based on these results, it can be concluded that the dribbling skills in futsal game at SMK Negeri 1 South Bengkulu are in the medium category, namely 10 people or with a percentage of 50%.*
