Prahasti²

This research aims to build a decision support system for assessing the performance of people's representatives at Commission IV DPRD of Bengkulu Province using the Promethea method. In this research, the author uses the Promethee method to assess the performance of people's representatives in Commission IV DPRD of Bengkulu Province in order to produce performance that is truly in line with expectations. Where the selected alternative is seen from the 3 promethee values, namely Leaving Flow and Entering Flow, Net Flow. Therefore, a decision support system was designed to determine the performance of the people's representatives of DPRD of Bengkulu Province using the Promethee method. This decision support system was designed using the PHP programming language and MySQL database. The system created can make it easier for DPRD in Bengkulu Province to determine the performance assessment of people's representatives in DPRD of Bengkulu Province
