This study aims to find out how to use video tutorials on digital simulation subjects at SMK Negeri 7 of Bengkulu City. The method used in this research is Descriptive Qualitative with data collection techniques in the form of questionnaires, interviews and documentation. Samples in this study were 35 students of class X Hospitality 1. The results of this study show that video tutorials are used in digital simulation learning in class X Hospitality to make the learning process more interesting and also students are more motivated when learning. Utilization of video tutorials can also achieve learning objectives and students are more in control of the material seen through video tutorials. Learning this video tutorial also makes students feel happy and not bored while learning because this video tutorial makes the learning process more varied and in learning activities students complete more assignments because this video tutorial is effective and efficient in learning.
